

Operations Pack

Menu engineering · staffing · SOP library · safety & hygiene · schedules · training — for a 48-seat heritage Nyonya restaurant, ~55 m² kitchen, lunch + dinner, closed Mondays.

PROJECT REF JRT-2026-AGL-01	PREPARED FOR Auntie Gaik Lean's Old School Eatery — Bishop Street, George Town, Penang
PREPARED BY JR-Tech Solution Sdn Bhd x TechNext	DATE 4 July 2026
REVISION R1	STATUS SAMPLE — illustrative deliverable, figures modelled for demonstration

— Contents

1.0 Scope of this pack	Sheet 1
2.0 Recommended menu — engineering & costing	Sheet 2
3.0 Staff & workflows — crew, duties, service cycle	Sheet 3
4.0 SOP library — 14 procedures + worked sample	Sheet 4
5.0 Safety, hygiene & policies — HACCP, LPM, TY2, chemicals	Sheet 5
6.0 Schedules — daily, weekly, monthly · roster vs covers	Sheet 6
7.0 Training plan & acceptance sign-off	Sheet 7

1.0 Scope of this pack

This pack operationalises the approved Kitchen Blueprint (ref. JRT-2026-AGL-01, Blueprint Pack R1: RM185,000 equipment schedule, 7-week build). It assumes the six-station layout as installed — wok line (2 woks under the smokeless hood), simmer/stock, steam, cold prep/kerabu, dessert/plating, dishwash return — and a normal trading day of **130 covers ≈ RM12,350** at an average check of RM95. Every SOP, policy and schedule below is delivered as a live record in the client's Odoo workspace under the JR-Tech recurring service (RM2,980/mo), so the document you are reading is a snapshot, not the system.

2.0 Recommended menu — engineering & costing

Twelve items carry the opening menu: the eight heritage anchors Auntie Gaik Lean is known for, plus four supporting items that fill station idle time. Each dish is costed against the installed equipment schedule (E-xx references per the Blueprint Pack) so the menu never asks the kitchen for capacity it does not have.

DISH	CATEGORY	PRICE RM	FOOD COST RM	FC %	MARGIN RM	STATION
Curry Kapitan	Anchor — main	38.00	12.90	34%	25.10	Simmer → finish
Perut Ikan	Anchor — main	36.00	13.30	37%	22.70	Simmer/si
Gulai Tumis	Anchor — main	42.00	15.50	37%	26.50	Simmer/si
Jiu Hu Char	Anchor — main	28.00	8.10	29%	19.90	Wok line
Nyonya Chap Chye	Anchor — vegetable	24.00	6.20	26%	17.80	Wok line
Otak-otak	Anchor — starter	26.00	8.60	33%	17.40	Steam
Kerabu Bee Hoon	Anchor — salad	26.00	7.00	27%	19.00	Cold prep/kera
Cendol	Anchor — dessert	14.00	2.80	20%	11.20	Dessert/p

Inchi Kabin	Support — starter	32.00	10.20	32%	21.80	Wok line (
Hong Bak	Support — main	34.00	11.90	35%	22.10	Simmer/si
Acar Awak	Support — side	12.00	3.00	25%	9.00	Cold prep (batch)
Pengat Pisang	Support — dessert	13.00	3.10	24%	9.90	Dessert/p

Blended food cost at the modelled sales mix: **30.4%** — inside the 28–32% band the Financial Pack assumes. The matrix below plots each dish by popularity (share of a 130-cover day) against gross margin; bubble size is daily revenue contribution.

R-1 • Pre-batch Kapitan rempah

Curry Kapitan and Gulai Tumis share a rempah base. Batch it twice weekly at the simmer station (SOP-04) and hold chilled in E-07; wok finish drops from 14 min to 6 min per order at peak.

R-2 • Push Cendol as the star

20% food cost and near-universal uptake make Cendol the highest-velocity margin item. Print it on every table tent and train servers to offer it by default; the E-11 station runs it with zero wok-line load.

R-3 · Prep-ahead kerabu

Kerabu Bee Hoon components (toasted coconut, herbs, dressing) prep fully by 10:00 and assemble to order in under 3 minutes at E-06 — it becomes the pressure-relief dish when the wok line queues.

3.0 Staff & workflows

A 7-person crew is right-sized for 48 seats turning ~130 covers across lunch and dinner. Roles map one-to-one to the blueprint's six stations, with the head chef (Auntie's lead) on the pass. Closed Mondays gives the roster a natural deep-clean and rest anchor.

4.0 SOP library

Fourteen standard operating procedures, each owned by a named role, scheduled at a fixed frequency, and stored as a live record in Odoo (Knowledge article + recurring activity), so completion is logged, not assumed.

REF	SOP	OWNER	FREQUENCY	ODOO RECORD
SOP-01	Opening checks (gas, hood, chillers, water)	Head chef	Daily 08:30	Checklist activity, Maintenance app
SOP-02	Closing & shutdown sequence	Head chef	Daily 22:30	Checklist activity
SOP-03	Receiving & FIFO storage	Cold prep cook	Daily 08:30–09:30	Inventory receipt + quality check
SOP-04	Sambal / rempah batch prep	Steam-simmer cook	Tue & Fri	Manufacturing order (batch recipe)
SOP-05	Wok seasoning & smokeless-hood operation	Wok cook 1	Daily / hood weekly	Maintenance checklist E-01/E-03
SOP-06	Steamer descale	Steam-simmer cook	Fortnightly	Maintenance request E-05
SOP-07	Chiller temperature log	Steward	3× daily	Quality check E-06/E-07/E-08
SOP-08	Thaw protocol (chiller thaw only)	Cold prep cook	Daily PM pull	Inventory internal transfer
SOP-09	Dishwash chemical dosing (JR-Chemical)	Steward	Daily + refill	Consumable reorder rule

SOP-10	Grease-trap weekly service	Steward	Thu, weekly	Maintenance request E-10
SOP-11	Waste log (food + oil)	Steward	Daily close	Waste record, Inventory scrap
SOP-12	Pest-prevention routine	Head chef	Weekly + monthly contractor	Recurring activity + vendor PO
SOP-13	Gas leak response	All staff	Drill quarterly	Knowledge article + drill log
SOP-14	Incident report	Head chef	As required, ≤ 24 h	Helpdesk ticket to JR-Tech

SOP-03 · RECEIVING & FIFO STORAGE

Owner: Cold prep cook · Daily 08:30–09:30 · Rev R1

1. **Stage & verify.** Receive at the back-lane door only. Check every line against the Odoo purchase order — quantity, grade, and supplier seal intact.
2. **Temperature check.** Probe chilled goods on arrival: reject anything above **5°C** (fish, poultry, coconut milk). Frozen goods must show no thaw drip. Record readings in the Odoo quality check.
3. **Sensory check.** Fish: clear eyes, firm flesh, sea smell only. Fresh herbs (daun kesum, bunga kantan) crisp and unbruised — kerabu quality dies here, not at the plate.
4. **Label.** Date-label every item on receipt: received date + use-by. No unlabelled container enters E-06/E-07/E-08.
5. **FIFO placement.** New stock behind or below old stock, never in front. Raw proteins on the lowest shelf; ready-to-eat above.
6. **Put away within 20 minutes.** Chilled goods must be inside a chiller within 20 minutes of arrival; log the put-away time.
7. **Close the loop.** Validate the receipt in Odoo; rejected lines trigger an automatic supplier credit-note request.

Critical limits: receive chilled ≤ 5°C · frozen fully frozen · put-away ≤ 20 min · any rejection photographed and logged before the driver leaves. Two rejections from one supplier in 30 days escalates to a JR-Tech sourcing review.

5.0 Safety, hygiene & policies

The pack adopts HACCP critical control points scaled to a single-kitchen operation, plus the Malaysian statutory requirements that inspectors actually check in George Town.

5.1 HACCP critical control points

CCP	CRITICAL LIMIT	MONITORED BY	CORRECTIVE ACTION
Receiving (chilled)	$\leq 5^{\circ}\text{C}$ at delivery	Cold prep cook, probe + Odoos QC	Reject line, supplier credit note
Cold holding	$\leq 4^{\circ}\text{C}$ in E-06/E-07	Steward, 3x daily log	Move stock, raise maintenance request, discard if > 2 h exposed
Cooking	$\geq 75^{\circ}\text{C}$ core (fish, chicken, otak-otak)	Station cook, probe spot-checks	Continue cooking, re-probe before pass
Hot holding	$\geq 60^{\circ}\text{C}$ (gulai, kapitan pots)	Steam-simmer cook	Reheat to 75°C once, else discard
Cooling	$60^{\circ}\text{C} \rightarrow 21^{\circ}\text{C}$ within 2 h	Steam-simmer cook, blast-portion in shallow pans	Discard if limit missed; log incident

5.2 Personal hygiene policy

- Clean uniform and apron daily; aprons off before toilet or waste runs.
- Hand wash on entry, after raw protein handling, every 30 minutes on the cold line.
- No jewellery below the elbow; hair fully covered; nails short and unpolished.
- Cuts covered with blue detectable plasters plus a glove.
- Staff with vomiting or diarrhoea excluded 48 h symptom-free before return.

5.3 Malaysia statutory requirements

- **Food-handler training (LPM):** every crew member completes the KKM-recognised Latihan Pengendali Makanan course; certificates stored in Odoo HR with expiry alerts.
- **TY2 typhoid vaccination:** valid for all food handlers; injection dates and 3-year renewals tracked in Odoo HR.
- MBPP premises licence and grease-trap discharge compliance (SOP-10) kept current; inspection folder exportable from Odoo in one click.

5.4 Cleaning-chemical safety — JR-Chemical dilution chart

PRODUCT	USE	DILUTION	CONTACT TIME	PPE
JR-Chemical Machine Detergent	Dishwasher E-09 auto-dose	Auto pump, 2 ml/L	Machine cycle	Gloves when changing drum
JR-Chemical Rinse Aid	Dishwasher final rinse	Auto pump, 0.5 ml/L	Machine cycle	Gloves
JR-Chemical Degreaser HD	Hood E-03, wok surrounds	1:10 hot water	10 min, then rinse	Gloves + goggles
JR-Chemical Surface Sanitiser	Food-contact surfaces	1:100	60 s, air dry	None (food-safe)
JR-Chemical Floor Cleaner	Floors, grease-trap area	1:40	Mop and dry	Gloves, wet-floor sign

Never mix chlorine sanitiser with acidic descaler (SOP-06). Chemicals live in the labelled lockup below the dish table — never above or beside food.

6.0 Schedules

6.1 Daily timeline (Tue-Sun)

TIME	ACTIVITY	LEAD
08:30	Opening checks (SOP-01); receiving & FIFO (SOP-03)	Head chef / cold prep
09:00	Stocks and gulai bases on E-04; rempah days: batch prep (SOP-04)	Steam-simmer cook
10:00	Prep done: kerabu components, otak-otak wrapped, cendol set	All stations
11:00	Line check, crew meal, service brief at the pass	Head chef
11:30–14:30	Lunch service (~55 covers)	Full crew
14:30–17:00	Break / split; PM prep, thaw pulls (SOP-08), chiller log	Rotating pair
17:30–21:30	Dinner service (~75 covers)	Full crew
21:30	Last orders; waste log (SOP-11); breakdown starts	Steward
22:30	Closing & shutdown (SOP-02); close-down complete	Head chef

6.2 Weekly grid

DAY	FIXED TASK
Mon	Closed — deep-clean rotation A (wok line + hood filters if due)
Tue	Rempah batch (SOP-04); dry-store tidy
Wed	Deep-clean rotation B — chillers E-06/E-07 interior

Thu	Grease-trap service (SOP-10)
Fri	Rempah batch (SOP-04); weekend par build
Sat	Peak trade — no scheduled maintenance
Sun	Hood E-03 filter wash ; steamer descale fortnightly (SOP-06)

6.3 Monthly cadence

- **JR-Tech preventive-maintenance visit** — full equipment schedule E-01 → E-11 serviced under the RM2,980/mo agreement; findings logged as Odoo maintenance requests.
- **Pest-control contractor** visit + bait-station report (SOP-12).
- **Full stock take** — first Monday (closed day); Odoo inventory adjustment and food-cost variance review against the 30.4% target.
- **Gas-leak drill** quarterly (SOP-13) — logged with attendance.

6.4 A typical operating week

gantt title Week plan — Auntie Gaik Lean kitchen
dateFormat YYYY-MM-DD axisFormat %a section Trading
Lunch and dinner service :svc, 2026-07-07, 6d section
Prep and clean Deep-clean A (closed day) :dca, 2026-07-06, 1d Rempah batch Tue :rb1, 2026-07-07, 1d Deep-clean B chillers :dcb, 2026-07-08, 1d Grease-trap service :gt, 2026-07-09, 1d Rempah batch Fri :rb2, 2026-07-10, 1d Hood filter wash :hf, 2026-07-12, 1d

6.5 Roster vs expected covers — normal day

Staff on shift tracks demand: full 7-person crew through both services, a 2-person spine through the afternoon lull. Splits keep labour honest without starving the prep window.

7.0 Training plan & acceptance

A four-week opening-crew training plan runs in parallel with weeks 4–7 of the equipment installation timeline, so the crew is service-ready the day the kitchen is handed over.

WEEK	THEME	CONTENT	SIGN-OFF GATE
W1	Foundations & compliance	LPM course completion check, TY2 verification, hygiene policy, chemical safety and dilution chart, SOP-13 gas drill	Certificates on file in Odoo HR
W2	Stations & equipment	Per-station equipment induction E-01 → E-11 with JR-Tech engineer; SOP-05/06/07/09/10 walkthroughs	Station competency checklist per person
W3	Menu & recipes	All 12 dishes cooked to spec cards under head chef; rempah batching; portioning to costed yields	Blind taste + portion audit passed
W4	Service simulation	Two dry-run services (friends & family, 40 then 60 covers), full ticket flow, dish-return loop, close-down	Ticket times inside targets; go / no-go review

On acceptance, all SOPs, logs and schedules go live in the client's Odoo workspace and enter the JR-Tech monthly service cycle. The next deliverable in the sequence is the [Financial Pack](#).
